self-pay basis.

MORE Health[®]

for KIDS

EVERY KID DESERVES MORE

As a parent, it's difficult to see your child suffering from a serious illness. MORE Health for Kids provides peace of mind and confidence to help you make the right decisions for your family during this critical time.

88% of second medical opinions result in major changes, which is why getting a second opinion from a leading expert is a must. If your child is facing cancer, surgery, a neurological or cardiac event, or another serious illness, we can help.

HERE'S HOW IT WORKS

1. Our Case Manager will explain the process, gather medical records, and select the top Physician Specialist for your diagnosis.
2. Our Physician Specialist will review your case through our digital platform.
3. Within five days, you will receive your second opinion and recommended treatment plan.

Included in the MORE Health Second Opinion Benefit (Employee + Family Rate)
