

CS+ Spring Series

Computer Science & Artificial Intelligence

VIRTUAL WORKSHOP
WED., MARCH 27TH
4:00PM - 5:30PM

MEET THE TEAM

Rebecca Bailey
Mendocino, COE
rbailey@mcoe.us

Mindy Keegan
Mendocino, COE
mkeegan@mcoe.us

Join us to learn more about Artificial Intelligence in your K-12 classroom!

- Activate background knowledge and develop a shared understanding of teaching about and with Artificial Intelligence
- Experience Artificial Intelligence activities that connect to California's CS standards
- Explore AI web-based resources to teach about and with AI and create a plan to try them out with your students

Explore and experience connections between Computer Science and Artificial Intelligence. Begin a journey to teaching about AI and with AI. This synchronous learning is coupled with 90 minutes of asynchronous activities to be completed independently. Teachers completing both components will be compensated \$125.

REGISTER HERE

Administrators, teachers, and school counselors are invited to join.

Registration is open and free to any California teacher and no prior experience with Computer Science is necessary!
